Macro-80

Macro-80 assembler by Microsoft

This assembler/linker/library package was made by Microsoft for CP/M. It was later ported to MSX.

Included in the package:

- CREF80.COM: Cross reference facility. Used to generate special listing that can be used for diagnostic.
- L80.COM: Linking loader. Used to load the relocatable modules compiled with Macro-80 Assembler.
- LIB80.COM: Library manager. Used to create and modify libraries later linked to compiled programs.
- M80.COM: Assembler with complete facilities for macro development.
